Isle of Man Code Club

Come and take part in our Island-wide Lego Mindstorms Sumo competition. Open to all students, schools, club and robotics enthusiasts in the Isle of Man

We are launching the first ever Manx Lego Sumo National Competition and inviting everyone who wants to take part to build a Lego Mindstorms robot and compete in a sensational knock-out. We aim to find the meanest, fastest, cleverest robot of them all. The aim is simple, each robot needs to knock it's opponent out of the ring to win their round. Keep doing this to all your opponents and be crowned a winner!

Rules: Date for submission: 14th November. Robots must fit in a 25cm cube and use a single NXT or EV3 Lego Mindstorms Kit. Sumo Ring is 1m across and robots start back-to-back with a beacon attached. Best of 3 rounds.

Interested? Have a Lego Mindstorms kit? Come join us on Saturday at Code Club if you need help or support. Any questions to: robotics@codeclub.im
